Table of Contents

1 Overview of Aqua Drive System.....	p. 1	3 Operating Aqua Drive System.....	P. 11
1.1 What is the aqua drive system?.....	P. 1	3.1 Technical issues of ADS	P. 12
1.2 Advantages and problems to be solved.....	P. 2	3.1.1 Pressure loss in a pipeline	P. 12
2 Components for Aqua Drive System.....	P. 3	3.1.2 Cavitation and erosion	P. 13
2.1 Components and accessories	P. 3	3.1.3 Surge pressure prevention.....	P. 14
2.1.1 Pump	P. 3	3.1.4 Frequency characteristics with use.....	P. 17
2.1.2 Actuator	P. 4	of servovalve	
(Water hydraulic motor and cylinder)		3.2 ADS operational guideline	P. 18
2.1.3 Control valve.....	P. 5	3.2.1 Water quality evaluation test.....	P. 18
2.1.4 Pipe and Coupling	P. 6	3.2.2 Control and maintenance of water quality.....	P. 21
2.1.5 Reservoir	P. 7	3.2.3 System operation temperature.....	P. 21
2.1.6 Accessories	P. 7	3.2.4 Effectiveness of cooler.....	P. 23
(Filter, accumulator and others)		3.3 Other issues.....	P. 24
2.2 Working fluid.....	P. 9	4 Application of Aqua Drive System.....	P. 25
2.2.1 Working fluid.....	P. 9	Reference.....	P. 27
2.2.2 Water quality.....	P. 9	JFPA Water Hydraulics Committee Members	P. 27
2.3 Materials.....	P. 10
